

MAKSYM HERASYMENKO

Senior Backend Engineer | Java · Spring Boot · Microservices | Banking & Telco

[linkedin.com/in/herasymenko](https://www.linkedin.com/in/herasymenko) | maksym.site | github.com/maksymhs | Madrid, Spain | Remote | Authorized to work in the EU

Senior backend engineer with 10 years building high-traffic, regulated Java systems for banking and telecommunications. Deep expertise in the Spring ecosystem, event-driven and hexagonal architectures and observability; migrated architectures, made APIs 2x faster and embedded quality in CI/CD. Currently building the backend for Openbank's launch in Germany. Looking for remote senior backend, platform or fintech engineering roles.

PROFESSIONAL EXPERIENCE

Software Engineer Jun 2025 – Present

Openbank (Grupo Santander) — Madrid, Spain

- Building Java and Spring Boot services for Openbank's launch in Germany, adapting the domain model and configuration to German regulation.
- Event-driven communication on AWS SQS, decoupling services and moving customer onboarding to asynchronous processing.
- Large multi-team codebase: keeping architectural consistency across service boundaries.
- Built AI-assisted internal tooling (MCP server and agents) to trace and diagnose onboarding flows end to end across microservices and logs.

Stack: Java, Spring Boot, AWS SQS, CloudWatch, microservices

Software Engineer Oct 2021 – May 2025

Paradigma Digital — Madrid, Spain (client: Simyo, telecommunications)

- Key contributor to the full backend revamp of Simyo, the highest-rated telco app in Spain (4.8 Play Store / 4.7 App Store).
- Designed aggregation endpoints that removed redundant CRM calls, making API responses 2x faster.
- Led the migration from MVC to hexagonal architecture, so teams could evolve subsystems independently without breaking contracts.
- Built AOP instrumentation (Spring proxies) for logging and security monitoring, feeding real-time anomaly detection in Kibana.
- Created Grafana dashboards and alerting from scratch, reducing mean time to detection of production incidents.

Stack: Java, Spring Boot, PostgreSQL, Redis, Google Cloud, Grafana, Kibana

Software Engineer Nov 2019 – Oct 2021

Experis (ManpowerGroup) — Madrid, Spain

- Banco Santander: microservices bridging Spring Boot with legacy COBOL (TRX) mainframe transactions, with Hystrix circuit breakers under high concurrency.
- Integrated automated E2E suites (Selenium) into Jenkins CI/CD, verifying full flows on every build; one of the first teams in the project to do so.
- Fira Barcelona (Mobile World Congress): COVID access-control services integrating third-party health-verification APIs under tight deadlines.

Stack: Java, Spring Boot, Hystrix, DB2, Oracle, OpenShift, Jenkins, Gradle

Software Engineer Jun 2016 – Sep 2019

everis (NTT Data) — Murcia, Spain (client: Telefónica)

- Java and Spring Boot services for critical telecom infrastructure, in large codebases serving millions of users.
- Developed SOAP and REST services for cross-system integrations.
- Introduced JUnit and SonarQube practices that reduced defect rates and became the team standard.

Stack: Java, Spring Boot, Oracle, SonarQube, Jenkins

TECHNICAL SKILLS

Core	Java (10 years), Spring Boot, Spring MVC, Spring Security, Spring Data, Spring AOP, Hibernate
Architecture	Microservices, Event-Driven, Hexagonal / Clean Architecture, REST API design, resilience patterns
Cloud & Platforms	AWS (SQS, CloudWatch), Google Cloud, OpenShift, Docker
Databases	PostgreSQL, Redis, Oracle, DB2
Observability	Grafana, Kibana, Spring Boot Actuator, AOP instrumentation
Quality & Delivery	JUnit, Selenium, SonarQube, Jenkins, GitLab CI, Maven, Gradle
AI-Assisted Eng.	MCP servers, LLM agents for internal tooling; Windsurf, Devin
Side Projects	Public MCP server of this profile (api.maksym.site/mcp); "Ask my CV" assistant on a Cloudflare Worker (maksym.site); source of this site (github.com/maksymhs/maksymhs.github.io)
Languages	Spanish, Russian, Ukrainian (native); English (professional)

EDUCATION

B.Sc. in Computer Science Engineering 2015 – 2019

UCAM — Universidad Católica San Antonio de Murcia

Publication: "Hay Sitio: a collaborative application for managing student workspaces in computer science", *Proceedings of JENUI*, Vol. 4 (2019).
