Senior Backend Engineer · Java & Spring Boot

I build reliable, observable backend systems for regulated, high-traffic products in banking and telco. 10 years so far, currently at Openbank (Grupo Santander).

EXPERIENCE

Jun 2025 —
Present

Openbank (Grupo Santander)

Software Engineer · Digital bank, Germany market launch

- Building Java & Spring Boot services for the **launch of Openbank in Germany**, adapting the domain model and configuration to German regulatory requirements.
- Implemented **event-driven communication on AWS SQS**, decoupling services and moving customer-onboarding work to asynchronous processing.
- Working in a **large multi-team codebase**, keeping architectural consistency across service boundaries.
- Built **AI-assisted internal tooling** (MCP server + agents) that lets engineers trace and diagnose onboarding flows end-to-end across microservices and logs.

Java · Spring Boot · AWS SQS · CloudWatch · Microservices

Oct 2021 —
May 2025

Paradigma Digital

Software Engineer · Client: Simyo, the highest-rated telco app in Spain (4.8 Play Store / 4.7 App Store)

- Worked on the **full revamping of the app's backend**, from architecture migration to performance optimization.
- Designed aggregation endpoints that removed redundant CRM calls, making responses **2x faster**.
- **Led the migration from MVC to hexagonal architecture**, decoupling domain logic from infrastructure so teams could evolve subsystems independently.
- Built **observability from scratch**: AOP-based instrumentation (Spring proxies) for logging and security monitoring feeding real-time anomaly detection in Kibana, plus Grafana dashboards and alerting that **reduced mean time to detection**.

Java · Spring Boot · PostgreSQL · Redis · GCP · Grafana · Kibana

Nov 2019 —
Oct 2021

Experis (ManpowerGroup)

Software Engineer · Clients: Banco Santander, Fira Barcelona (Mobile World Congress)

- **Banco Santander**: built microservices bridging Spring Boot with legacy **COBOL mainframe** transactions, using circuit breakers for fault tolerance under high concurrency.
- Integrated **automated E2E test suites into Jenkins CI/CD**, verifying end-to-end flows on every build — one of the first teams in the project to do it.
- **Mobile World Congress**: delivered COVID access-control services integrating third-party health-verification APIs under tight deadlines.

Java · Spring Boot · Hystrix · DB2 · Oracle · OpenShift · Jenkins

Jun 2016 —
Sep 2019

everis (NTT Data)

Software Engineer · Client: Telefónica

- Built Java & Spring Boot services for **critical telecom infrastructure**, in large codebases serving **millions of users**.
- Designed SOAP and REST services for cross-system integrations.
- Introduced JUnit and SonarQube practices that **reduced defect rates** and became the team standard.

Java · Spring Boot · Oracle · SonarQube · Jenkins

SKILLS

Languages & frameworks

Java · Spring Boot · Spring MVC · Spring Security · Spring Data · Spring AOP · Hibernate

Architecture

Microservices · Event-driven · Hexagonal / Clean Architecture · REST API design · Resilience patterns

Cloud & platforms

AWS (SQS, CloudWatch) · Google Cloud · OpenShift · Docker

Data	PostgreSQL · Redis · Oracle · DB2
Observability	Grafana · Kibana · Spring Boot Actuator · AOP instrumentation
Quality & delivery	JUnit · Selenium · SonarQube · Jenkins · GitLab CI · Maven · Gradle
AI-assisted engineering	Windsurf · Devin · MCP servers · LLM agents for internal tooling
Languages	Spanish, Russian, Ukrainian (native) · English (professional)

BSc Computer Science Engineering · UCAM, Murcia · 2015–2019

Publication: “Hay Sitio: a collaborative application for managing student workspaces in computer science”, JENUI Proceedings, Vol. 4 (2019)
